AutoHotkey v1.4.0 Changelog

New Features

- Added a new auto-updating feature. This should make updating the automation scripts more smooth in future releases.
  - Upon loading "master_switch.ahk", the script will check for a new update. If one is found it will prompt the user to update. Once completed, a changelog like this document will open, showing the various changes that the update provides.
- Two new hotkeys are now implemented:
  - Shift+Q: Converts selected geometry into a path
  - Shift+W: Swaps the direction of a path

Changes

- Improved the reliability of the y key.
- Removed the ASC KP and Non-Library lists.

Bug Fixes
